

DATACARD® TRU™ FINGERPRINT SOLUTION

Choose the powerful yet easy-to-operate Tru Fingerprint solution for fully integrated fingerprint capture and verification.

- Works seamlessly with Datacard ID Works and ViaNet software
- Captures fingerprint templates and images with equal ease
- Adds advanced identity verification to any operation
- Printed fingerprints help deter identity theft
- Available exclusively from Datacard Group

COST-EFFECTIVE FINGERPRINT CAPTURE AND VERIFICATION

The Datacard® Tru™ Fingerprint solution combines the intuitive Datacard® Tru™ Fingerprint software and an advanced fingerprint reader. Depending on your edition of Datacard® identification software, the solution can enable biometric enrollment and verification and/or capture and storage of photographic fingerprint images.

- **Powerful enrollment and verification.** When used with Datacard® ID Works® Enterprise identification software, the Tru Fingerprint solution allows you to scan a fingerprint, create a mathematical representation of it and store this digital template in a biometric database. This makes it easy to perform one-to-one fingerprint matching required for sophisticated biometric identity verification.
- **Convenient capture and storage.** When used with Datacard® ID Works® Basic, Standard or Enterprise identification software, or with Datacard® ViaNet® identity information software, the Tru Fingerprint solution can capture a photographic image of a cardholder's fingerprint, then print it on a secure photo ID card. Adding this photographic image to a card can help deter identity theft.
- **Easy setup and operation.** The Tru Fingerprint solution is easy to install and very simple to use. After successfully installing your ID Works or ViaNet software, simply install the Tru Fingerprint software, connect the fingerprint reader and you are ready to scan fingerprints.

SECURE ID AND CARD PERSONALIZATION SOLUTIONS

DATACARD® TRU™ FINGERPRINT SOLUTION

The powerful, intuitive Datacard® Tru™ Fingerprint solution allows organizations to take advantage of advanced biometric verification and/or print fingerprint images on photo IDs.

Standard features

Key capabilities

- Capture, print and store fingerprint images
- Enroll and verify biometric fingerprint templates (with ID Works Enterprise software)
- One-to-one verification (with ID Works Enterprise software)

Solution components

- Datacard Tru Fingerprint Software
- Identix® BioTouch® 200 USB Fingerprint Reader
- USB license key
- Installation instructions
- User documentation

Specifications (reader)

- Size**
2.4 in. W x 3.8 in. L x 1.2 in. H
(60 mm x 96 mm x 31 mm)
- Weight**
0.33 lbs (150.0 g)
- Sensor**
DFR® 200 optical sensor
- Image capture surface**
0.66 x 0.66 in. (17 x 17 mm)
- Interface**
USB
- Power**
Available through USB port
- Operating temperature**
32° to 131° F (0° to 55° C)
- Agency approvals**
FCC
UL
CE
VCCI
C-Tick

System requirements

For fingerprint image capture

- ID Works Enterprise identification software
- ID Works Standard identification software
- ID Works Basic identification software
- ViaNet identity information software

For enrollment and verification

- ID Works Enterprise identification software

For fingerprint reader

- Two free USB ports
